

PRODUCT: Polyether – Polyol (Polymeric 25%)

Polyether – Polyol, is a non-reactive polymer polyol with about 25% solid content and 3500 average Molecular weight of standard polyol, designed for the production of enhanced load bearing flexible Polyurethane slab stock foams.

It can be used individually or blended with other polyols.

Application:

Slab stock flexible polyurethane foams.

Items	Unit	Test Method	Standard
Appearance	-	Visual	White, viscous liquid
Hydroxyl Value	Mg KOH/g	ASTM D 4274	36-40
Viscosity at 25 °C	cP	ASTM D 4878	1000-1700
Water (Karl-Fischer) max	%	ASTM E 203	0.1
Content in Solid substance	%	ILL 003/3-01-14	24-27
