

PRODUCT: Pygas

Pygas is a naphtha-range product with a high aromatics content used either for gasoline blending or as a feedstock for a BTX extraction unit. Pyrolysis gasoline is produced in an ethylene plant that processes naphtha, butane or gasoil.

Items	Unit	Standards
Benzene	vol %	Min 50
Toluene	vol %	R&R
Xylene/Ethyl benzene	vol %	R&R
Total C5's and lighter	vol %	Max 1
Total C9's and heavier	vol %	Max 1
Sulfur	ppm, wt	Max 10
H2S, SO2 and Mercaptans	-	Nil
