

PRODUCT: Isobutyl Acetate

Isobutyl Acetate, also known as 2-methylpropyl ethanoate (IUPAC name) or β -methylpropyl acetate.

Application:

It is a common solvent. It is produced from the esterification of isobutanol with acetic acid. It is used as a solvent for lacquer and nitrocellulose.

Items	Unit	Standards
Odour & Appearance	-	clear, colourless liquid with sweet, "fruity" odour
Vapour Pressure	mmHg	13
Evaporation rate	-	1.5
Vapour density		99
Boiling range	°C	117
Freezing point	°C	-99
Spacific gravity	-	0.871
Viscosity	-	0.7
pH	-	None
