

PRODUCT: Perchloroethylene

Perchloroethylene is a clear, water-white liquid at room temperature. It is volatile, has a sweet odor, and is completely miscible with most organic liquids.

Application:

Perchloroethylene offers many physical and chemical properties that make it the right chlorinated solvent for many applications. It is relatively inert and inherently more stable than other chlorinated solvents.

Items	Unit	Standards
Boiling Point	°C	121
Specific gravity at 20 °C	-	1.6
Freezing Point	°C	-22.3
Density at 20°C	lbs/gal	13.6
Vapor pressure @ -20°C	mm Hg	14.2
